

HiltonBecker MD Essential Lipids

If you suffer from dry and cracked skin, or an aged appearance; it may be that the quantity of essential lipids in your skin's outer layer is not balanced enough to adequately retain healthy moisture content.

Dr. Becker's Essential Lipids is a powerful moisturizer and hydration stabilizer; created to replenish the skin's natural lipid quantity, by restoring essential lipids which are lost to aging, washing, stress, or environmental exposure.

Now you can nourish delicate skin membranes and lock in moisture, to regain a youthful and healthy appearance. Take advantage of this fabulous formula, and the intelligent replenishment of lipids.

benefits

- Hydrates and soothes dry, weathered or irritated skin
- Restores critical moisture balance
- Replenishes the quantity of skin lipids lost to aging, elements and daily activity
- Helps the outer layer of the skin to retain moisture more efficiently
- Safe and suitable for all skin types

daily application

Morning and Evening
or as often as needed.

directions

Apply to 2 or 3 drops and gently massage onto skin.
Use on entire face or affected areas.

ingredients

Cyclopentasiloxane, Cyclotetrasiloxane, Dimethicone, Squalane, Dimethiconol, Ethylhexyl Cocoate, Caprylyl Glycol, Phenyl Trimethicone, Dimethicone, Lecithin, Glycosphingolipids.

how it works

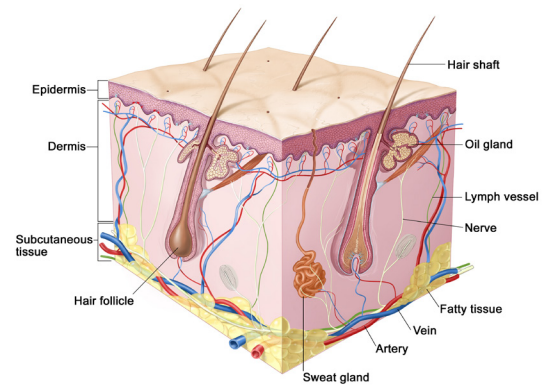

Essential lipids are a naturally occurring family of compounds which in quantity support the delicate membranes, and improve the moisture content of the skin. The outer most layer of your skin depends on a balanced quantity of lipids to hold the moisture within and to keep your skin healthy and youthful in appearance.

Unfortunately due to factors such as aging or environmental exposure, the skin loses its natural lipid count, leading to an upset in moisture balance, dried skin, wrinkles and an aged appearance. Although the body naturally replenishes its lipid content, the effectiveness and speed may be hindered by age, diet, stress, or genetics.

Dr. Becker's Essential Lipids uses a mixture of plant-derived lipids, extracted via biofermentation techniques, to deliver instant replenishment to lacking or undernourished skin. This provides a natural and fast acting boost of moisture equilibrium, to compensate for the body's inadequate lipid count.

We've mixed these essential lipids into a Squalane based emollient, for the most direct and rapid delivery. Squalane, a plant-derived extract, is absorbed and integrated seamlessly into the skins, thanks to its compatibility and affiliation with sebum (natural skin oils).

Once replenished, Dr. Becker's 'Essential Lipids' goes to work, replenishing the outer layer of the skin to better maintain moisture.

The outer most layer of your skin (epidermis) depends on a balanced quantity of lipids

A mixture of plant derived lipids delivers much needed moisture balance to your skin

Based in a Squalane emollient, the lipids are deployed rapidly for instant results
