

HiltonBecker MD Vitamin C Serum 12%

Vitamin C is an essential nutrient, and integral factor in the quality and efficiency of the skin's natural Collagen synthesis process. Without adequate levels of Vitamin C your skin struggles to maintain normal healthy levels of Collagen and antioxidant protection.

Dr. Becker's Vitamin C Serum 12% Provides antioxidant benefits to fight oxidative stress & free radicals. The antioxidant benefits of Vitamin C help protect the skin from harmful environmental influences like free radicals and pollution.

Artfully blended in a soft and soothing serum, this remarkable formula promotes healthy, visibly vibrant skin, and is convenient and easy to apply.

benefits

- Helps boost collagen
- Provides antioxidant benefits to fight oxidative stress & free radicals
- Is stabilized for efficiency and longevity

daily application

Morning & Evening after cleansing

directions

Place 2-3 drops in palm of hand and apply with fingertips, into area to be treated.

ingredients

Propylene Glycol, L-Ascorbic Acid.

how it works

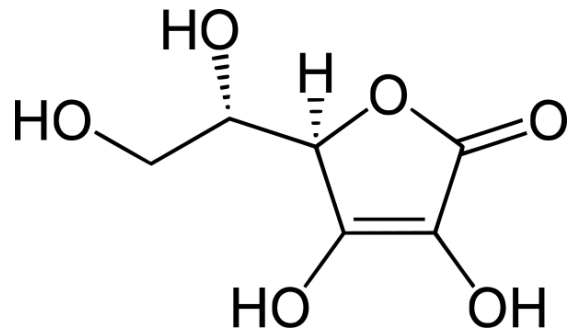

As you get older Collagen synthesis slows down and the skin is not so easily repaired. Exposure to the environment also contributes towards the destruction of your skin's Collagen levels, resulting in an aged and older appearance.

Vitamin C also known as Ascorbic Acid is an essential nutrient. It plays a significant role in the Collagen synthesis process and is a highly effective antioxidant, reducing oxidative stress, and fighting free radicals. Applying Vitamin C will help protect from the environment's dangerous elements.

Vitamin C acts as an antioxidant as it oxidative stress. Since Vitamin C on its own is energetically prone to oxidization it is very unstable when exposed to air or water. To prolong the efficiency and shelf life of this formula, we've created a stable 12% mixture of Vitamin C.

Applying Vitamin C will help hinder the process of aging and protect your skin.

Vitamin C plays a significant role in the Collagen synthesis process
